LinkedIn | MALAI Club Website

PROFESSIONAL SUMMARY

Programmer Analyst at Cognizant with experience supporting enterprise insurance applications in the Guidewire InsuranceSuite domain. Work includes investigating production issues, troubleshooting claims-related tickets, root-cause analysis, and targeted technical changes. Computer Science graduate pursuing an M.Tech in Artificial Intelligence & Machine Learning through BITS Pilani WILP, with project experience across web development, computer vision, and AI/ML.

TECHNICAL SKILLS

Languages: Java, Python, C, JavaScript, SQL, Gosu **Web:** HTML, CSS, React.js, Node.js
Backend & Data: Spring Boot, JDBC, REST API concepts, MySQL, Oracle SQL, MongoDB
AI/ML: Machine Learning, Deep Learning, NLP, Computer Vision, TensorFlow, Keras, Scikit-learn, OpenCV, NLTK
Tools & Concepts: Git/GitHub, VS Code, Postman, Maven, JUnit, Data Structures & Algorithms, OOP

PROFESSIONAL EXPERIENCE

Cognizant — Programmer Analyst | Guidewire InsuranceSuite (ECOS Production Support) | Jun 2025 – Present

- Investigate and troubleshoot production support tickets involving insurance claims and enterprise application workflows.
- Analyze reported issues including policy number mismatches and note-deletion scenarios; assist with root-cause identification and resolution.
- Support debugging, operational troubleshooting, and issue resolution while performing limited targeted development and technical changes.
- Apply Guidewire and insurance-domain knowledge to investigate application behavior and support reliable day-to-day operations.

PROJECTS

AI-Based IT Training System | Python, Flask, React.js, SQL | Aug–Nov 2024

- Developed an adaptive learning platform with progress tracking, automated assessments, and NLP-based evaluation of descriptive answers.
- Implemented course-completion tracking so assessments become available only after learning material is completed; addressed assessment-data interference and grading accuracy.

MALAI Club Website | HTML, CSS, JavaScript, MySQL, JSP | Nov 2023–Apr 2024

- Designed a dynamic website to manage club memberships, events, and announcements; built an admin panel for event/member management and updates.
- Worked on database-query optimization and responsive navigation. Website: anuragweb.club/malai.

Criminal Detection Using Computer Vision | Python, OpenCV

- Explored facial-recognition and image-processing techniques for criminal-detection workflows; secured second place in Wachahax-ML Hackathon (Mar 2022).

OpenCV Hand Canvas | Python, OpenCV, NumPy

- Built a webcam-based hand-gesture drawing prototype; secured second place at Tejas Project Expo (Jan 2024).

EDUCATION

M.Tech, Artificial Intelligence & Machine Learning — BITS Pilani, Work Integrated Learning Programmes (WILP) (Pursuing)
B.Tech, Computer Science & Engineering — Anurag University, 2021–2025 **(CGPA: 8.71/10)**
Class XII, FIITJEE Junior College, 2021 (CGPA: 8.78/10) | Class X, Delhi Public School, 2019 (CGPA: 9.27/10)

LEADERSHIP & ACHIEVEMENTS

President, MALAI (Machine Learning & Artificial Intelligence) Club, Anurag University | 2023–2024
Led a team of nine coordinating ML, Deep Learning, and NLP workshops; organized Tech Hack-3, a 36-hour national-level hackathon with approximately 500 participants. Supported workshops including OpenCV/TensorFlow, ANN, AI MedQuest, NLP Nexus, and the DAKSHA AI track.

CERTIFICATIONS

Microsoft Certified: Azure AI Engineer Associate (AI-102) | Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate
Full Stack Development with React & Node.js — GeeksforGeeks | Data Structures & Algorithms — Udemy
